

# Patient Specialty Pharmacy Contact Information

## Important Information to Know About Having Your Intrauterine Device (IUD) Shipped Directly to Your Healthcare Provider

The IUD prescribed by your healthcare provider will be shipped directly to your healthcare provider's office from one of the Specialty Pharmacies listed below. Specialty Pharmacies dispense products that are not typically stocked in traditional retail pharmacies.

## Patient Responsibility: What You Need to Do

- You may soon receive a phone call from your insurance plan's Specialty Pharmacy listed below concerning the prescription status for your intrauterine device (IUD).
- Your Specialty Pharmacy requires your personal authorization to fill the prescription as well as to notify you of any potential cost share of your insurance plan.
- If you do miss that call or if you are interested in checking the status of your prescription, you can contact the appropriate pharmacy at the number listed below.
- Please note that the pharmacy will only attempt to contact you via phone a limited number of times prior to cancelling the prescription.

**IMPORTANT REMINDER:** Your intrauterine device (IUD) will not be shipped to your healthcare provider's office if you have not returned the call of the Specialty Pharmacy.

**For Office:** Please check appropriate specialty pharmacy for patient's prescription request.

### Select Choice of Specialty Pharmacies
