How to Verify Patient Benefits

In-office benefits investigation

Your office may find it helpful to use the Benefits Verification Worksheet at the same time you are checking the office visit copay and procedure coverage. This may save you and your staff time by only having to check coverage once.

Office personnel may verify a patient's IUD coverage by contacting the patient's health insurance company directly. The phone number can usually be found on the patient's insurance card. The Benefits Verification Worksheet may be a helpful resource to record the following information when verifying benefits with the payer:

- The reference number of the call
- The full name of the individual quoting the benefits
- The date and time of the call
- Other important notes from the call

Questions to ask during a benefits investigation

- Can you check coverage for Kyleena (J7296) / Mirena (J7298) / Skyla (J7301) for diagnosis code Z30.430?
- Does the health insurance plan comply with the mandates under the Affordable Care Act (ACA)? If yes, is Kyleena/ Mirena/ Skyla available as a covered benefit with \$0 cost share to the patient?
- What is the patient's financial responsibility, including copayment, coinsurance, and/or deductible? If the patient has a deductible, how much has been met and does the cost of Kyleena/ Mirena/ Skyla apply to the deductible, or is it covered as a preventive service not subject to deductible or cost share?
- What are the coverage and payment levels for all codes that will be billed, including the procedure?
- Is a prior authorization required?

Patient initiated benefits investigation

As an alternative to your office checking your patient's IUD benefits, you may wish to offer patients the Bayer Patient Benefits Guide which may help patients when contacting the insurance company themselves to check their IUD coverage.

For Additional Assistance

If you have questions, or need additional assistance getting access to Kyleena/ Mirena/ Skyla for your patients, please contact your Bayer Clinical Sales Specialist or Field Reimbursement Manager. Field Reimbursement Managers are specially trained to educate you and your staff on coding, billing, and reimbursement policies and procedures for Bayer products.
